

October 2012: Assistant Secretary for Health, Department of Health and Human Services tasked IPRCC and NIH to address IOM Recommendation 2-2.

“develop a comprehensive, population health-level strategy for pain prevention, treatment, management, education, reimbursement, and research that includes specific goals, actions, time frames, and resources.”

The Interagency Pain Research Coordinating Committee

February 2013

Representation

Public Education and and communication (with liaison to professional education and training)

- *Education is a central part of the necessary cultural transformation of the approach to pain. High quality, evidence based education programs for patients and the public...that are designed to promote a transformation in their expectations, beliefs, and understanding about pain, its consequences, its management, and its prevention are needed to make the transformation.*

Participants

- HHS
- NIH
- Centers for Disease Control and Prevention
- Agency for Healthcare Research and Quality
- Department of Defense
- Drug Enforcement Agency
- Department of Veterans Affairs
- Pain advocacy and awareness organizations
- Health professions associations
- Health care providers (e.g., accountable care organizations)
- State health departments
- National Association of Attorneys General
- Private insurers and Private Foundations
