Medical/Dental/Nursing Students Pain Education Workshop

September 24, 2010

Major Conclusions:

- 1) To change pain curricula, it is best if you have a "Pain Champion" at the institution who already wants to take on the cause.
- 2) Accreditation for medical schools might be a useful target for system-wide changes.

Feedback NIH

Provide input on important issues that affect NIH, the biomedical

Presentation by Dr. Larry Tabak, Deputy Director of the NIH to Senator Harkin's HELP committee

Feb. 14th, 2012

“The need for education of pain care professionals and researchers is also a key issue highlighted by the IOM report. To address this issue, the NIH Pain Consortium is encouraging medical, dental, nursing and pharmacy schools to respond to a new funding opportunity to develop Centers of Excellence in Pain Education (CoEPEs). The National Institute on Drug Abuse (NIDA) is leading the CoEPEs program, which will develop pain management curriculum resources for health care professionals that will advance the assessment, diagnosis, and safe treatment of pain.”

Southern Illinois University Edwardsville/St. Louis University Center of Excellence in Pain Education

Rochester Area Collaborative Center of Excellence in Pain Education

University of New Mexico Center of Excellence in Pain Education

Harvard School of Dental Medicine Center of Excellence in Pain Education

University of Alabama at Birmingham Center of Excellence in Pain Education

University of California, San Francisco, Center of Excellence in Pain Education

Thomas Jefferson School of Medicine Headache Collaborative Center of Excellence in Pain Education

University of Pittsburgh Center of Excellence in Pain Education: Pain Challenges in Primary Care

University of Maryland Baltimore Center of Excellence in Pain Education

Johns Hopkins University Center of Excellence in Pain Education

Launch

July 10-11, 2012, Bethesda, MD

Overall Goal:

Improve pain treatment through education

- 1) Develop and include pain education in the CoEPEs curriculum
- 2) Develop online pain education resource on the Pain Consortium website (and others)
- 3) Dissemination/Evaluation

1) Develop and include pain education in the CoEPEs curriculum

- 12 CoEPEs
- 100+ Teaching Institutions
- 250+ Participants

2) Develop online pain education resource on the Pain Consortium website (and other sites)
